

# RUNWAY CLOSURE UPDATE

July 1, 2022

***RE: Project AIP 3-40-0035-024: Rehabilitate RW 18/36 Pavement and Lighting***

The beginning stage for the construction phase of the Runway 18/36 Rehab Project is tentatively scheduled to begin after the July 4<sup>th</sup> holiday of 2023. The runway will be closed to all traffic during this time and a NOTAM will be issued.

*Rehabilitation of Runway 18/36 pavement and lighting system project includes an asphalt overlay, runway lighting system improvements, REILs, Guidance Signs, and drainage improvements. Pavement rehabilitation will consist of asphalt overlay to repair existing pavement failures. The existing runway lighting system, including signage and circuits, will be replaced as the existing system has reached its useful life and existing maintenance and repairs are no longer cost effective. Grading along the runway will be completed to comply with Part 77 safety standards. Project will increase safety on the airport and provide extended life to both the runway pavement and lighting system.*

This is the first of several updates I will send regarding this project. If you have any questions, please feel free to call me at 918-786-6150.
